

REMARKS

To date, the Examiner has not indicated that all of the subject matter of the information disclosure statement (IDS) filed December 10, 2004 has been properly considered. Additionally, the Examiner has not indicated that all of the subject matter of the IDS filed July 21, 2005 has been properly considered, specifically the documents under the Foreign Patent or Foreign Patent Application section. A copy each IDS is submitted herewith. If the Examiner requires additional copies of any reference(s), applicant invites the Examiner to contact the undersigned. Documentation in the file wrapper of the instant application confirming the Examiner's consideration of the appropriate reference(s) is respectfully requested.

The Examiner has rejected Claims 1-2, 4-13, 18-20 and 44-45 under 35 U.S.C.112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant respectfully disagrees with this assertion.

In the Examiner's response to applicant's arguments, the Examiner has merely stated that the previous rejections are maintained. In response, applicant incorporates the relevant remarks set forth in the response dated 08/24/2006.

Further, applicant notes that the Examiner has taken issue with the following terms, for example:

"identifier"

"allowing"

"file"

"correspondence"

"associating"

"accessible"

"reported"

“add icon”

“modify icon”

“file structure field.”

In response, applicant respectfully points out that such terms are clear from the plain and ordinary meaning thereof, as evidenced by dictionary definitions, etc.

Further, the Examiner sets forth numerous questions, examples of which are addressed below:

First, is the first identifier the same identifier that the notes were stored with?

The claims are broadly drafted such that this may or may not be the case.

If there is only one identifier, how can there be a first and second identifier.

Applicant does not claim “only one” identifier, but rather a, or at least one, identifier.

Are these in addition to the identifier stored with the notes?

The claims are broadly drafted such that this may or may not be the case.

If there is only one file, how can there be a first file and a second file?

Applicant does not claim “only one” file, but rather a, or at least one, file.

Thus, how can a plurality of patents be associated with one patent number?

An example of this is set forth of in Figure 11. Of course, such example should not be construed as limiting in any manner, since any “associating,” in terms of its plain and ordinary meaning, is covered by the claim language.

How can one category become each category?

The claims do not require only one category.

The Examiner has further argued that Claim 20 is indefinite since applicant amended the invention from a method to a system but does not provide any structure to the system. In response applicant respectfully disagrees. Specifically, note should be taken of the claimed “computer readable medium” with “computer code.”

In addition, the Examiner has rejected Claims 1-2, 4-13, 18-20, and 44-45 under 35 U.S.C. 103(a) as being unpatentable over Rivette (U.S. Patent No. 2003/0046307). Applicant respectfully disagrees with such rejection, especially in view of the amendments made hereinabove to the independent claims.

For example, applicant has amended the independent claims to further distinguish applicant’s claim language from the Rivette reference, as follows:

“displaying statistics regarding a number of the patents of the set in each category of technology in a first interface,

displaying first additional information associated with at least a portion of the patents of the set in a second interface separate from the first interface upon the selection of an icon positioned in the first interface and associated with one of the statistics, for drilling down from the first interface to the second interface, wherein the first additional information includes a list of the patents of the set associated with one category of technology,

displaying second additional information associated with at least one of the patents of the list in a third interface separate from the first interface and the second interface upon the selection of an additional icon positioned in the second interface and associated with one of the patents, for drilling down from the second interface to the third interface, wherein the second additional information is selected from the group consisting of a patent number, a status, an exemplary claim, and an exemplary figure,” in the context claimed (see this or similar, but not necessarily identical language in the independent claims).

Applicant respectfully asserts that many benefits arise from the synergy of the technology mapping, and the remaining claimed framework. Specifically, a user is capable of associating patents with at least one identifier (with additional notes associated therewith), and also obtaining technology-related metrics regarding a set of patents, with one framework that is more effectively organized (see details of claims). Specifically, only applicant teaches and claims such a drill-down technique for accessing information relating to the patents subject to the technology mapping, which is believed to be unique, when taken in combination with the remaining claim elements.

To establish a *prima facie* case of obviousness, three basic criteria must be met. First, there must be some suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings. Second, there must be a reasonable expectation of success. Finally, the prior art reference (or references when combined) must teach or suggest all the claim limitations. The teaching or suggestion to make the claimed combination and the reasonable expectation of success must both be found in the prior art and not based on applicant’s disclosure. *In re Vaeck*, 947 F.2d 488, 20 USPQ2d 1438 (Fed.Cir.1991).

Applicant respectfully asserts that at least the third element of the *prima facie* case of obviousness has not been met, since the prior art references, when combined, fail

to teach or suggest all of the claim limitations, as noted above. Thus, a notice of allowance or specific prior art showing of each of the foregoing claim elements, in combination with the remaining claimed features, is respectfully requested.

To this end, all of the independent claims are deemed allowable. Moreover, the remaining dependent claims are further deemed allowable, in view of their dependence on such independent claims.

In the event a telephone conversation would expedite the prosecution of this application, the Examiner may reach the undersigned at (408) 505-5100. The Commissioner is authorized to charge any additional fees or credit any overpayment to Deposit Account No. 50-1351 (Order No. SVIPGP002B).

Respectfully submitted,
Zilka-Kotab, PC.

INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §§ 1.56 AND 1.97(c)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Examiner:

The references listed in the attached PTO Form 1449(s), at least one of which was provided by an Examiner(s) handling a related patent application(s), copies of which are attached, may be material to examination of the above-identified patent application. Applicants submit these references in compliance with their duty of disclosure pursuant to 37 CFR §§ 1.56 and 1.97. The Examiner is requested to make these references of official record in this application.

This Information Disclosure Statement is not to be construed as a representation that a search has been made, that additional information material to the examination of this application does not exist, or that these references indeed constitute prior art.

This Information Disclosure Statement is being filed after the mailing date of a first Office Action. Accordingly, applicants are including a check in the amount of \$180.00 for the fee due in connection with the filing of this Information Disclosure Statement. However, if it is determined that any additional fees are due, the Commissioner is hereby authorized to charge such fees or credit any overpayment to Deposit Account 50-1351 (Order No. SVIPGP002B).

Respectfully submitted,

~~Zilka-Kotab, PC~~

INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §§1.56 AND 1.97(b)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

The reference(s) listed in the attached PTO Form 1449, cop(ies) of which is attached (when necessary), may be material to examination of the above-identified patent application. Applicants submit the reference(s) in compliance with their duty of disclosure pursuant to 37 CFR §§ 1.56 and 1.97. The Examiner is requested to make the reference(s) of official record in this application.

This Information Disclosure Statement is not to be construed as a representation that a search has been made, that additional information material to the examination of this application does not exist, or that the reference(s) indeed constitutes prior art.

This Information Disclosure Statement is believed to be filed before the mailing date of a first Office Action on the merits (and after the filing of an RCE). Accordingly, it is believed that no fees are due in connection with the filing of this Information Disclosure Statement. However, if it is determined that any fees are due, the Commissioner is hereby authorized to charge such fees to Deposit Account 50-1351 (Order No. SVIPG002B).

Respectfully submitted,
Zilka-Kotab, PC
